

## Sleep Screening Questionnaire

Please answer the questions below to help us assess the possibility of a sleep disorder which may be related to your dental and overall health. There is often a correlation between grinding of the teeth, TMJ disorders, breakdown of the teeth and sleep disorders. Sleep apnea may also increase your risk for many different health conditions including heart attack and stroke. If you are here with your child (under 16), please fill out the lower portion marked "For children only" for your child.
